Volume contents

Volume 152 (2005)

Regular articles

Multiplex mRNA profiling for the identification of body fluids
J. Juusola and J. Ballantyne (USA) 1–12

Optimization and validation of a fully automated silica-coated magnetic beads purification technology in forensics
M. Nagy, P. Otremba, C. Krüger, S. Bergner-Greiner, P. Anders, B. Henske, M. Prinz and L. Roewer (Germany, USA) 13–22

Characterization of the polymorphic repeat sequence within the rDNA IGS of *Cannabis sativa*
H.-M. Hsieh, C.-L. Liu, L.-C. Tsai, R.-J. Hou, K.-L. Liu, A. Linacre and J.C.-I. Lee (Taiwan, UK) 23–28

5-(4-Nitrophenyl)-2,4-pentadien-1-al (NPPD) used as a tracer by nonscientists at a simulated crime scene
S. Suzuki, H. Ohta, Y. Suzuki, R. Sugita, M. Kasamatsu, M. Mori and H. Nakajima (Japan) 29–34

mtDNA HVI length heteroplasmic profile in different tissues of maternally related members
C. Bini and G. Pappalardo (Italy) 35–38

Estimation of the age of human bloodstains by electron paramagnetic resonance spectroscopy: Long-term controlled experiment on the effects of environmental factors
Y. Fujita, K. Tsuchiya, S. Abe, Y. Takiguchi, S.-i. Kubo and H. Sakurai (Japan) 39–43

Inferring the population of origin of DNA evidence within the UK by allele-specific hybridization of Y-SNPs
J.H. Wetton, K.W. Tsang and H. Khan (UK) 45–53

A typology of mass grave and mass grave-related sites
E. Jessee and M. Skinner (Canada) 55–59

Homicide by ligature strangulation in Finland: Offence and offender characteristics
H. Häkkänen (Finland) 61–64

Fatal steamer accident; blunt force injuries and drowning in post-mortem MSCT and MRI
E. Aghayev, M.J. Thali, M. Sonnenschein, J. Hurlimann, C. Jackowski, T. Kilchoer and R. Dirnhofer (Switzerland) 65–71

The prevalence of MDMA/MDA in both hair and urine in drug users
E. Han, W. Yang, J. Lee, Y. Park, E. Kim, M. Lim and H. Chung (South Korea) 73–77

Announcement of population datas

Autosomic STR population data in two Caribbean samples from Colombia
B. Martínez, L. Caraballo, L. Gusmão, A. Amorim and A. Carracedo (Colombia, Portugal, Spain) 79–81

Population data for 12 Y-chromosome STRs in a sample from Brescia (northern Italy)
N. Cerri, A. Verzeletti, B. Bandera and F. De Ferrari (Italy) 83–87

Y-chromosomal STR haplotypes in a Belgian population sample and identification of a micro-variant with a flanking site mutation at DYS19
K. De Maesschalck, E. Vanhoutte, K. Knaepen, N. Vanderheyden, J.-J. Cassiman and R. Decorte (Belgium) 89–94

Y-chromosomal STR haplotypes in three ethnic groups and one cosmopolitan population from Tunisia
L. Cherni, L. Pereira, A. Goios, B.Y. Loueslati, H.K. el Khil, I. Gomes, L. Gusmão, C. Alves, A. Slama, A. Amorim and A.B. Elgaaied (Tunisia, Portugal) 95–99

doi:10.1016/S0379-0738(05)00356-7

Dairy of future events ..... I–IV

Regular papers

Facial soft tissue thickness in Japanese female children
H. Utsuno, T. Kageyama, T. Deguchi, M. Yoshino, H. Miyazawa and K. Inoue (Japan) 101–107

Identification of DNA of human origin based on amplification of human-specific mitochondrial cytochrome *b* region
H. Matsuda, Y. Seo, E. Kakizaki, S. Kozawa, E. Muraoka and N. Yukawa (Japan) 109–114

Relatedness and DNA: are we taking it seriously enough?
J. Buckleton and C.M. Triggs (New Zealand) 115–119

A molecular identification system for grasses: a novel technology for forensic botany
J. Ward, R. Peakall, S.R. Gilmore and J. Robertson (Australia) 121–131

Forensic evaluation and haplotypes of 19 Y-chromosomal STR loci in Koreans
M.J. Park, H.Y. Lee, J.-E. Yoo, U. Chung, S.Y. Lee and K.-J. Shin (Republic of Korea) 133–147

Driving under the influence of drugs — evaluation of analytical data of drugs in oral fluid, serum and urine, and correlation with impairment symptoms
S.W. Toennes, G.F. Kauert, S. Steinmeyer and M.R. Moeller (Germany) 149–155

Some pyridine derivatives as "route-specific markers" in 4-methoxyamphetamine (PMA) prepared by the Leuckart method. Studies on the role of the aminating agent in their distribution in the final product
D. Błachut, K. Wojtasiewicz and Z. Czarnocki (Poland) 157–173

Determination of synthesis method of ecstasy based on the basic impurities
M. Świst, J. Wilamowski and A. Parczewski (Poland) 175–184

Chemical characterization of counterfeit captagon tablets seized in Jordan
M.A. Alabdalla (Jordan) 185–188

Raman spectroscopy and the forensic analysis of black/grey and blue cotton fibres. Part 1. Investigation of the effects of varying laser wavelength
J. Thomas, P. Buzzini, G. Massonnet, B. Reedy and C. Roux (Australia, Switzerland) 189–197

Rapid and simple method for direct determination of several amphetamines in seized tablets by GC–FID
B. Mitrevski and Z. Zdravkovski (Macedonia) 199–203

Determination of the hand from single digit fingerprint: a study of whorls
I. Singh, P.K. Chattopadhyay and R.K. Garg (India) 205–208

Forensic interpretation of Y-chromosomal DNA mixtures
A. Wolf, A. Caliebe, O. Junge and M. Krawczak (Germany) 209–213

Mass spectra and time-resolved fluorescence spectroscopy of the reaction product of glycine with 1,2-indanedione in methanol
I.M. Alaoui, E.R. Menzel, M. Farag, K.H. Cheng and R.H. Murdock (Morocco, USA) 215–219

Survey of crowbar and household paints in burglary cases—population studies, transfer and interpretation
P. Buzzini, G. Massonnet, S. Birrer, N.M. Egli, W. Mazzella and A. Fortini (Switzerland) 221–234

Qualitative and quantitative analysis of seized street drug samples and identification of source
S.P. Sharma, B.C. Purkait and S.C. Lahiri (India) 235–240

Raman spectroscopy of blue gel pen inks
W.D. Mazzella and P. Buzzini (Switzerland) 241–247

Fluorescence optimisation and lifetime studies of fingerprints treated with magnetic powders
L.K. Seah, U.S. Dinish, W.F. Phang, Z.X. Chao and V.M. Murukeshan (Singapore) 249–257

Announcement of population data

Allelic frequencies of 13 STR loci in autochthonous Basques from the province of Vizcaya (Spain)
A.M. Pérez-Miranda, M.A. Alfonso-Sánchez, A. Kalantar, J.A. Peña, M.M. de Pancorbo and R.J. Herrera (USA, Spain, United Arab Emirates) 259–262

Genetic profile of 15 STR loci in the Min Nan population in Southeast China
S.P. Hu, D.Q. Wu, X.H. Xu, J.W. Liu and B. Li (PR China) 263–265

STR population diversity in nine ethnic populations living in Dubai
F. Alshamali, A.Q. Alkhayat, B. Budowle and N.D. Watson (UAE, USA, UK) 267–279

Allele frequencies of 19 STR loci in a Philippine population generated using AmpFlSTR multiplex and ALF singleplex systems
M.C.A. De Ungria, R.K. Roby, K.A. Tabbada, S. Rao-Coticone, M.M.M. Tan and K.N. Hernandez (Philippines, USA, Spain) 281–284

Genetic data for the 13 CODIS STR loci in Singapore Chinese
C.K.C. Syn, S.Y. Chuah, H.C. Ang, S.E.S. Lim, W.F. Tan-Siew, S.T. Chow and B. Budowle (Singapore, USA) 285–288
Y chromosome STR haplotypes in three UK populations
D.J. Ballard, C. Phillips, C.R. Thacker, C. Robson, A.P. Revoir and D. Syndercombe Court (UK) 289–305
Population data for the Identifier™ 15 STR loci in Hong Kong Chinese
K.M. Chan, C.T. Chiu, P. Tsui, D.M. Wong and W.K. Fung (China) 307–309

Review article
The place of a forensic archaeologist at a crime scene involving a buried body
L.L. Menez (UK) 311–315

Book reviews
Statistics and the Evaluation of Evidence for Forensic Scientists
J. Wiley and J. Buckleton (USA, New Zealand) 317
Weight-of-Evidence for Forensic DNA Profiles
P. Gill and J. Buckleton (UK, New Zealand) 319

Letters to the editor
Power of excluding an elder brother of a child from paternity
Y.-Q Hu, W.K. Fung and Y.Q. Hu (China) 321–322
Driving impairment on buprenorphine and slow-release oral morphine in drug-dependent patients
S. Giacomuzzi, Y. Riemer, W. Haaser and L. Pilsz (Austria) 323–324

Dairy of future events ..... I–III

Subject index

Volume 152 (2005)

Acetyl codeine; Heroin, Morphine, Acetyl morphine, GC–MS, HPTLC, Isotopic substitution, Source **152**, 235

Acetyl morphine; Heroin, Morphine, Acetyl codeine, GC–MS, HPTLC, Isotopic substitution, Source **152**, 235

Admixture; Ethnic appearance, Biogeographic ancestry, Y-SNP **152**, 45

ALFexpress; Philippines, Identifiler, Multiplex, Singleplex, D8S1179 **152**, 281

Allele frequencies; Polymerase chain reaction (PCR), Short tandem repeats (STRs), Chinese, Identifier™ PCR amplification kit **152**, 307

Allele frequency; Short tandem repeat (STR), Min Nan Chinese population data, AmpFLSTR identifiler **152**, 263

Allelic frequencies; Short tandem repeats, AmpF/STR Profiler Plus, AmpF/STR Cofiler, CODIS, Basque Country **152**, 259

AmpF/STR Profiler; STRs, Population data, Colombian Caribbean coast **152**, 79

AmpF/STR® Profiler Plus™; Short tandem repeat (STR), Chinese allele frequencies, Singapore population data, AmpF/STR®Cofiler™ **152**, 285

AmpF/STR®Cofiler™; Short tandem repeat (STR), Chinese allele frequencies, Singapore population data, AmpF/STR® Profiler Plus™ **152**, 285

AmpF/STR Cofiler; Short tandem repeats, Allelic frequencies, AmpF/STR Profiler Plus, CODIS, Basque Country **152**, 259

AmpF/STR Profiler Plus; Short tandem repeats, Allelic frequencies, AmpF/STR Cofiler, CODIS, Basque Country **152**, 259

AmpFLSTR identifiler; Short tandem repeat (STR), Min Nan Chinese population data, Allele frequency **152**, 263

Amphetamines; Separation, Peak asymmetry, GC–FID **152**, 199

"Andalusians"; Y-chromosome, Short tandem repeats, Tunisia, Berbers, Arabs **152**, 95

Arabs; Y-chromosome, Short tandem repeats, Tunisia, Berbers, "Andalusians" **152**, 95

Automated extraction; DNA extraction, Short tandem repeat analysis, Real time PCR, Forensic DNA **152**, 13

Basque Country; Short tandem repeats, Allelic frequencies, AmpF/STR Profiler Plus, AmpF/STR Cofiler, CODIS **152**, 259

Berbers; Y-chromosome, Short tandem repeats, Tunisia, Arabs, "Andalusians" **152**, 95

Biogeographic ancestry; Ethnic appearance, Admixture, Y-SNP **152**, 45

Blood identification; RNA, mRNA profiling, Body fluid identification, Saliva identification, Semen identification, Vaginal secretions identification, Menstrual blood identification, Multiplex RT-PCR **152**, 1

Bloodstain age; Electron paramagnetic resonance (EPR), Bloodstain, Hemoglobin, Temperature, Sunlight **152**, 39

Bloodstain; Electron paramagnetic resonance (EPR), Bloodstain age, Hemoglobin, Temperature, Sunlight **152**, 39

Blue cotton; Forensic fibre analysis, Raman spectroscopy, Reactive dye, Fluorescence, Degradation, Laser wavelength **152**, 189

Body fluid identification; RNA, mRNA profiling, Blood identification, Saliva identification, Semen identification, Vaginal secretions identification, Menstrual blood identification, Multiplex RT-PCR **152**, 1

Burials; Forensic archaeology, Crime scene investigations, Exhumations, Forensic anthropology **152**, 311

doi:10.1016/S0379-0738(05)00358-0

Cannabis sativa; rDNA IGS, Repeat sequence, Polymorphism **152**, 23

Captagon; Counterfeit, GC–MS, Tablets **152**, 185

Chinese allele frequencies; Short tandem repeat (STR), Singapore population data, AmpF*l*STR® Profiler Plus™, AmpF*l*STR®Cofiler™ **152**, 285

Chinese; Polymerase chain reaction (PCR), Short tandem repeats (STRs), Allele frequencies, Identifier™ PCR amplification kit **152**, 307

CODIS; Short tandem repeats, Allelic frequencies, AmpF/STR Profiler Plus, AmpF/STR Cofiler, Basque Country **152**, 259

Colombian Caribbean coast; STRs, Population data, AmpF*l*STR Profiler **152**, 79

Computed tomography; Virtopsy, Forensic radiology, Magnetic resonance imaging, Steamer accident, Rupture of aorta **152**, 65

Counterfeit; Captagon, GC–MS, Tablets **152**, 185

Crime scene investigations; Forensic archaeology, Burials, Exhumations, Forensic anthropology **152**, 311

Cross transfer; Paint, Population studies, Simulated contacts, Paint transfer, Interpretation **152**, 221

C-stretch; Mitochondrial DNA, Sequencing, Length heteroplasmy **152**, 35

Cytochrome *b* gene; Human identification, Species determination, Mitochondrial DNA, Forensic casework **152**, 109

D8S1179; Philippines, Identifiler, Multiplex, Singleplex, ALFexpress **152**, 281

Degradation; Forensic fibre analysis, Raman spectroscopy, Reactive dye, Blue cotton, Fluorescence, Laser wavelength **152**, 189

Designer drugs; MDMA, MDA, Hair analysis **152**, 73

DNA extraction; Automated extraction, Short tandem repeat analysis, Real time PCR, Forensic DNA **152**, 13

rDNA IGS; Repeat sequence, *Cannabis sativa*, Polymorphism **152**, 23

DNA interpretation; Relatedness, Match probability **152**, 115

Document examination; Inks, Gel pen, Raman spectroscopy **152**, 241

Driving under the influence; Saliva/oral fluid, Serum, Urine, Drugs of abuse, Impairment symptoms **152**, 149

Drugs of abuse; Saliva/oral fluid, Serum, Urine, Driving under the influence, Impairment symptoms **152**, 149

DYS388; 19 Y-STRs, Minimal haplotype loci, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS434; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS435; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS436; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS437; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS438; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS439; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS446; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS449; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

DYS464; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, Gene diversity, Haplotype, Koreans **152**, 133

Electron paramagnetic resonance (EPR); Bloodstain, Bloodstain age, Hemoglobin, Temperature, Sunlight **152**, 39

Ethnic appearance; Biogeographic ancestry, Admixture, Y-SNP **152**, 45

Exhumations; Forensic archaeology, Burials, Crime scene investigations, Forensic anthropology **152**, 311

Facial reconstruction; Forensic anthropology, Facial soft tissue thickness, Skull and photo superimposition **152**, 101

Facial soft tissue thickness; Forensic anthropology, Facial reconstruction, Skull and photo superimposition **152**, 101

Fingerprint; 1,2-Indanedione, Fluorescence, Lifetime, Mass spectroscopy **152**, 215

Fingers; Glove, NPPD **152**, 29

Fluorescence lifetime; Latent fingerprint, Optimisation, Time-resolved method **152**, 249

Fluorescence; 1,2-Indanedione, Fingerprint, Lifetime, Mass spectroscopy **152**, 215

Fluorescence; Forensic fibre analysis, Raman spectroscopy, Reactive dye, Blue cotton, Degradation, Laser wavelength **152**, 189

Forensic anthropology; Facial reconstruction, Facial soft tissue thickness, Skull and photo superimposition **152**, 101

Forensic anthropology; Forensic archaeology, Burials, Crime scene investigations, Exhumations **152**, 311

Forensic archaeology; Burials, Crime scene investigations, Exhumations, Forensic anthropology **152**, 311

Forensic bioarchaeology; Mass grave, Mass grave-related site, Standardized nomenclature **152**, 55

Forensic botany; Grasses, Molecular identification system, Indels, PCR assay, Mitochondrial genome **152**, 121

Forensic casework; Human identification, Species determination, Mitochondrial DNA, Cytochrome *b* gene **152**, 109

Forensic DNA; DNA extraction, Automated extraction, Short tandem repeat analysis, Real time PCR **152**, 13

Forensic fibre analysis; Raman spectroscopy, Reactive dye, Blue cotton, Fluorescence, Degradation, Laser wavelength **152**, 189

Forensic radiology; Virtopsy, Computed tomography, Magnetic resonance imaging, Steamer accident, Rupture of aorta **152**, 65

Gas chromatography–mass spectrometry; Heterocyclic impurities, Route-specific markers, Structure elucidation, Suzuki cross-coupling **152**, 157

GC–FID; Amphetamines, Separation, Peak asymmetry **152**, 199

GC–MS; Counterfeit, Captagon, Tablets **152**, 185

GC–MS; Heroin, Morphine, Acetyl morphine, Acetyl codeine, HPTLC, Isotopic substitution, Source **152**, 235

Gel pen; Document examination, Inks, Raman spectroscopy **152**, 241

Gender; Homicide, Ligature strangulation, Motive, Relationship **152**, 61

Gene diversity; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Haplotype, Koreans **152**, 133

Glove; Fingers, NPPD **152**, 29

Grasses; Molecular identification system, Forensic botany, Indels, PCR assay, Mitochondrial genome **152**, 121

Hair analysis; Designer drugs, MDMA, MDA **152**, 73

Haplotype; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Koreans **152**, 133

Haplotype; Likelihood ratio, Y-chromosome, Trace, Population database **152**, 209

Haplotypes; Y chromosome, STR polymorphisms, UK populations **152**, 289

Hemoglobin; Electron paramagnetic resonance (EPR), Bloodstain, Bloodstain age, Temperature, Sunlight **152**, 39

Heroin; Morphine, Acetyl morphine, Acetyl codeine, GC–MS, HPTLC, Isotopic substitution, Source **152**, 235

Heterocyclic impurities; Route-specific markers, Gas chromatography–mass spectrometry, Structure elucidation, Suzuki cross- coupling **152**, 157

Homicide; Ligature strangulation, Motive, Gender, Relationship **152**, 61

HPTLC; Heroin, Morphine, Acetyl morphine, Acetyl codeine, GC–MS, Isotopic substitution, Source **152**, 235

Human identification; Species determination, Mitochondrial DNA, Cytochrome *b* gene, Forensic casework **152**, 109

Identification; Side determination, Ridges, Whorls **152**, 205

Identifier™ PCR amplification kit; Polymerase chain reaction (PCR), Short tandem repeats (STRs), Chinese, Allele frequencies **152**, 307

Identifiler; Philippines, Multiplex, Singleplex, ALFexpress, D8S1179 **152**, 281

Impairment symptoms; Saliva/oral fluid, Serum, Urine, Driving under the influence, Drugs of abuse **152**, 149

1,2-Indanedione; Fingerprint, Fluorescence, Lifetime, Mass spectroscopy **152**, 215

Indels; Grasses, Molecular identification system, Forensic botany, PCR assay, Mitochondrial genome **152**, 121

Inks; Document examination, Gel pen, Raman spectroscopy **152**, 241

Interpretation; Paint, Population studies, Simulated contacts, Paint transfer, Cross transfer **152**, 221

Isotopic substitution; Heroin, Morphine, Acetyl morphine, Acetyl codeine, GC–MS, HPTLC, Source **152**, 235

Italy; Y-chromosome, STR, Population data **152**, 83

Koreans; 19 Y-STRs, Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype **152**, 133

Laser wavelength; Forensic fibre analysis, Raman spectroscopy, Reactive dye, Blue cotton, Fluorescence, Degradation **152**, 189

Latent fingerprint; Fluorescence lifetime, Optimisation, Time-resolved method **152**, 249

Length heteroplasmy; Mitochondrial DNA, Sequencing, C-stretch **152**, 35

Leuckart method; MDMA, Reductive amination, Safrole bromination, Route specific impurities **152**, 175

Lifetime; 1,2-Indanedione, Fingerprint, Fluorescence, Mass spectroscopy **152**, 215

Ligature strangulation; Homicide, Motive, Gender, Relationship **152**, 61

Likelihood ratio; Y-chromosome, Haplotype, Trace, Population database **152**, 209

Magnetic resonance imaging; Virtopsy, Forensic radiology, Computed tomography, Steamer accident, Rupture of aorta **152**, 65

Mass grave; Mass grave-related site, Standardized nomenclature, Forensic bioarchaeology **152**, 55

Mass grave-related site; Mass grave, Standardized nomenclature, Forensic bioarchaeology **152**, 55

Mass spectroscopy; 1,2-Indanedione, Fingerprint, Fluorescence, Lifetime **152**, 215

Match probability; DNA interpretation, Relatedness **152**, 115

MDA; Designer drugs, MDMA, Hair analysis **152**, 73

MDMA; Designer drugs, MDA, Hair analysis **152**, 73

MDMA; Reductive amination, Leuckart method, Safrole bromination, Route specific impurities **152**, 175

Menstrual blood identification; RNA, mRNA profiling, Body fluid identification, Blood identification, Saliva identification, Semen identification, Vaginal secretions identification, Multiplex RT-PCR **152**, 1

Min Nan Chinese population data; Short tandem repeat (STR), Allele frequency, AmpFLSTR identifiler **152**, 263

Minimal haplotype loci; 19 Y-STRs, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133

Mitochondrial DNA; Human identification, Species determination, Cytochrome *b* gene, Forensic casework **152**, 109

Mitochondrial DNA; Sequencing, Length heteroplasmy, C-stretch **152**, 35

Mitochondrial genome; Grasses, Molecular identification system, Forensic botany, Indels, PCR assay **152**, 121

Molecular identification system; Grasses, Forensic botany, Indels, PCR assay, Mitochondrial genome **152**, 121

Morphine; Heroin, Acetyl morphine, Acetyl codeine, GC–MS, HPTLC, Isotopic substitution, Source **152**, 235

Motive; Homicide, Ligature strangulation, Gender, Relationship **152**, 61

mRNA profiling; RNA, Body fluid identification, Blood identification, Saliva identification, Semen identification, Vaginal secretions identification, Menstrual blood identification, Multiplex RT-PCR **152**, 1

Multiplex RT-PCR; RNA, mRNA profiling, Body fluid identification, Blood identification, Saliva identification, Semen identification, Vaginal secretions identification, Menstrual blood identification **152**, 1

Multiplex; Philippines, Identifiler, Singleplex, ALFexpress, D8S1179 **152**, 281

NPPD; Fingers, Glove **152**, 29

Optimisation; Latent fingerprint, Fluorescence lifetime, Time-resolved method **152**, 249

Paint transfer; Paint, Population studies, Simulated contacts, Interpretation, Cross transfer **152**, 221

Paint; Population studies, Simulated contacts, Paint transfer, Interpretation, Cross transfer **152**, 221

PCR assay; Grasses, Molecular identification system, Forensic botany, Indels, Mitochondrial genome **152**, 121

Peak asymmetry; Amphetamines, Separation, GC–FID **152**, 199

Philippines; Identifiler, Multiplex, Singleplex, ALFexpress, D8S1179 **152**, 281

Polymerase chain reaction (PCR); Short tandem repeats (STRs), Chinese, Allele frequencies, Identifier™ PCR amplification kit **152**, 307

Polymorphism; rDNA IGS, Repeat sequence, *Cannabis sativa* **152**, 23

Population data; Powerplex Y, Short tandem repeat, Y-chromosome **152**, 89

Population data; STRs, AmpFℓSTR Profiler, Colombian Caribbean coast **152**, 79

Population data; Y-chromosome, STR, Italy **152**, 83

Population database; Likelihood ratio, Y-chromosome, Haplotype, Trace **152**, 209

Population studies; Paint, Simulated contacts, Paint transfer, Interpretation, Cross transfer **152**, 221

Powerplex Y; Short tandem repeat, Population data, Y-chromosome **152**, 89

Raman spectroscopy; Document examination, Inks, Gel pen **152**, 241

Raman spectroscopy; Forensic fibre analysis, Reactive dye, Blue cotton, Fluorescence, Degradation, Laser wavelength **152**, 189

Reactive dye; Forensic fibre analysis, Raman spectroscopy, Blue cotton, Fluorescence, Degradation, Laser wavelength **152**, 189

Real time PCR; DNA extraction, Automated extraction, Short tandem repeat analysis, Forensic DNA **152**, 13

Reductive amination; MDMA, Leuckart method, Safrole bromination, Route specific impurities **152**, 175

Relatedness; DNA interpretation, Match probability **152**, 115

Relationship; Homicide, Ligature strangulation, Motive, Gender **152**, 61

Repeat sequence; rDNA IGS, *Cannabis sativa*, Polymorphism **152**, 23

Ridges; Side determination, Whorls, Identification **152**, 205

RNA; mRNA profiling, Body fluid identification, Blood identification, Saliva identification, Semen identification, Vaginal secretions identification, Menstrual blood identification, Multiplex RT-PCR **152**, 1

Route specific impurities; MDMA, Reductive amination, Leuckart method, Safrole bromination **152**, 175

Route-specific markers; Heterocyclic impurities, Gas chromatography–mass spectrometry, Structure elucidation, Suzuki cross-coupling **152**, 157

Rupture of aorta; Virtopsy, Forensic radiology, Computed tomography, Magnetic resonance imaging, Steamer accident **152**, 65

Safrole bromination; MDMA, Reductive amination, Leuckart method, Route specific impurities **152**, 175

Saliva identification; RNA, mRNA profiling, Body fluid identification, Blood identification, Semen identification, Vaginal secretions identification, Menstrual blood identification, Multiplex RT-PCR **152**, 1

Saliva/oral fluid; Serum, Urine, Driving under the influence, Drugs of abuse, Impairment symptoms **152**, 149

Semen identification; RNA, mRNA profiling, Body fluid identification, Blood identification, Saliva identification, Vaginal secretions identification, Menstrual blood identification, Multiplex RT-PCR **152**, 1

Separation; Amphetamines, Peak asymmetry, GC–FID **152**, 199

Sequencing; Mitochondrial DNA, Length heteroplasmy, C-stretch **152**, 35

Serum; Saliva/oral fluid, Urine, Driving under the influence, Drugs of abuse, Impairment symptoms **152**, 149

Short tandem repeat (STR); Chinese allele frequencies, Singapore population data, AmpF*l*STR® Profiler Plus™, AmpF*l*STR®Cofiler™ **152**, 285

Short tandem repeat (STR); Min Nan Chinese population data, Allele frequency, AmpFLSTR identifiler **152**, 263

Short tandem repeat analysis; DNA extraction, Automated extraction, Real time PCR, Forensic DNA **152**, 13

Short tandem repeat; Powerplex Y, Population data, Y-chromosome **152**, 89

Short tandem repeats (STRs); Polymerase chain reaction (PCR), Chinese, Allele frequencies, Identifier™ PCR amplification kit **152**, 307

Short tandem repeats; Allelic frequencies, AmpF/STR Profiler Plus, AmpF/STR Cofiler, CODIS, Basque Country **152**, 259

Short tandem repeats; Y-chromosome, Tunisia, Berbers, Arabs, "Andalusians" **152**, 95

Side determination; Ridges, Whorls, Identification **152**, 205

Simulated contacts; Paint, Population studies, Paint transfer, Interpretation, Cross transfer **152**, 221

Singapore population data; Short tandem repeat (STR), Chinese allele frequencies, AmpF*l*STR® Profiler Plus™, AmpF*l*STR®Cofiler™ **152**, 285

Singleplex; Philippines, Identifiler, Multiplex, ALFexpress, D8S1179 **152**, 281

Skull and photo superimposition; Forensic anthropology, Facial reconstruction, Facial soft tissue thickness **152**, 101

Source; Heroin, Morphine, Acetyl morphine, Acetyl codeine, GC–MS, HPTLC, Isotopic substitution **152**, 235

Species determination; Human identification, Mitochondrial DNA, Cytochrome *b* gene, Forensic casework **152**, 109

Standardized nomenclature; Mass grave, Mass grave-related site, Forensic bioarchaeology **152**, 55

Steamer accident; Virtopsy, Forensic radiology, Computed tomography, Magnetic resonance imaging, Rupture of aorta **152**, 65

STR polymorphisms; Y chromosome, Haplotypes, UK populations **152**, 289

STR; Y-chromosome, Population data, Italy **152**, 83

STRs; Population data, AmpFℓSTR Profiler, Colombian Caribbean coast **152**, 79

Structure elucidation; Heterocyclic impurities, Route-specific markers, Gas chromatography–mass spectrometry, Suzuki cross-coupling **152**, 157

Sunlight; Electron paramagnetic resonance (EPR), Bloodstain, Bloodstain age, Hemoglobin, Temperature **152**, 39

Suzuki cross-coupling; Heterocyclic impurities, Route-specific markers, Gas chromatography–mass spectrometry, Structure elucidation **152**, 157

Tablets; Counterfeit, Captagon, GC–MS **152**, 185

Temperature; Electron paramagnetic resonance (EPR), Bloodstain, Bloodstain age, Hemoglobin, Sunlight **152**, 39

Time-resolved method; Latent fingerprint, Fluorescence lifetime, Optimisation **152**, 249

Trace; Likelihood ratio, Y-chromosome, Haplotype, Population database **152**, 209

Traffic medicine 152, 323

Tunisia; Y-chromosome, Short tandem repeats, Berbers, Arabs, "Andalusians" **152**, 95

UK populations; Y chromosome, STR polymorphisms, Haplotypes **152**, 289

Urine; Saliva/oral fluid, Serum, Driving under the influence, Drugs of abuse, Impairment symptoms **152**, 149

Vaginal secretions identification; RNA, mRNA profiling, Body fluid identification, Blood identification, Saliva identification, Semen identification, Menstrual blood identification, Multiplex RT-PCR **152**, 1

Virtopsy; Forensic radiology, Computed tomography, Magnetic resonance imaging, Steamer accident, Rupture of aorta **152**, 65

Whorls; Side determination, Ridges, Identification **152**, 205

Y chromosome; STR polymorphisms, Haplotypes, UK populations **152**, 289

Y-chromosome; Likelihood ratio, Haplotype, Trace, Population database **152**, 209

Y-chromosome; Powerplex Y, Short tandem repeat, Population data **152**, 89

Y-chromosome; Short tandem repeats, Tunisia, Berbers, Arabs, "Andalusians" **152**, 95

Y-chromosome; STR, Population data, Italy **152**, 83

Y-SNP; Ethnic appearance, Biogeographic ancestry, Admixture **152**, 45

19 Y-STRs; Minimal haplotype loci, DYS388, DYS434, DYS435, DYS436, DYS437, DYS438, DYS439, DYS446, DYS449, DYS464, Gene diversity, Haplotype, Koreans **152**, 133
